

forecast of computational model

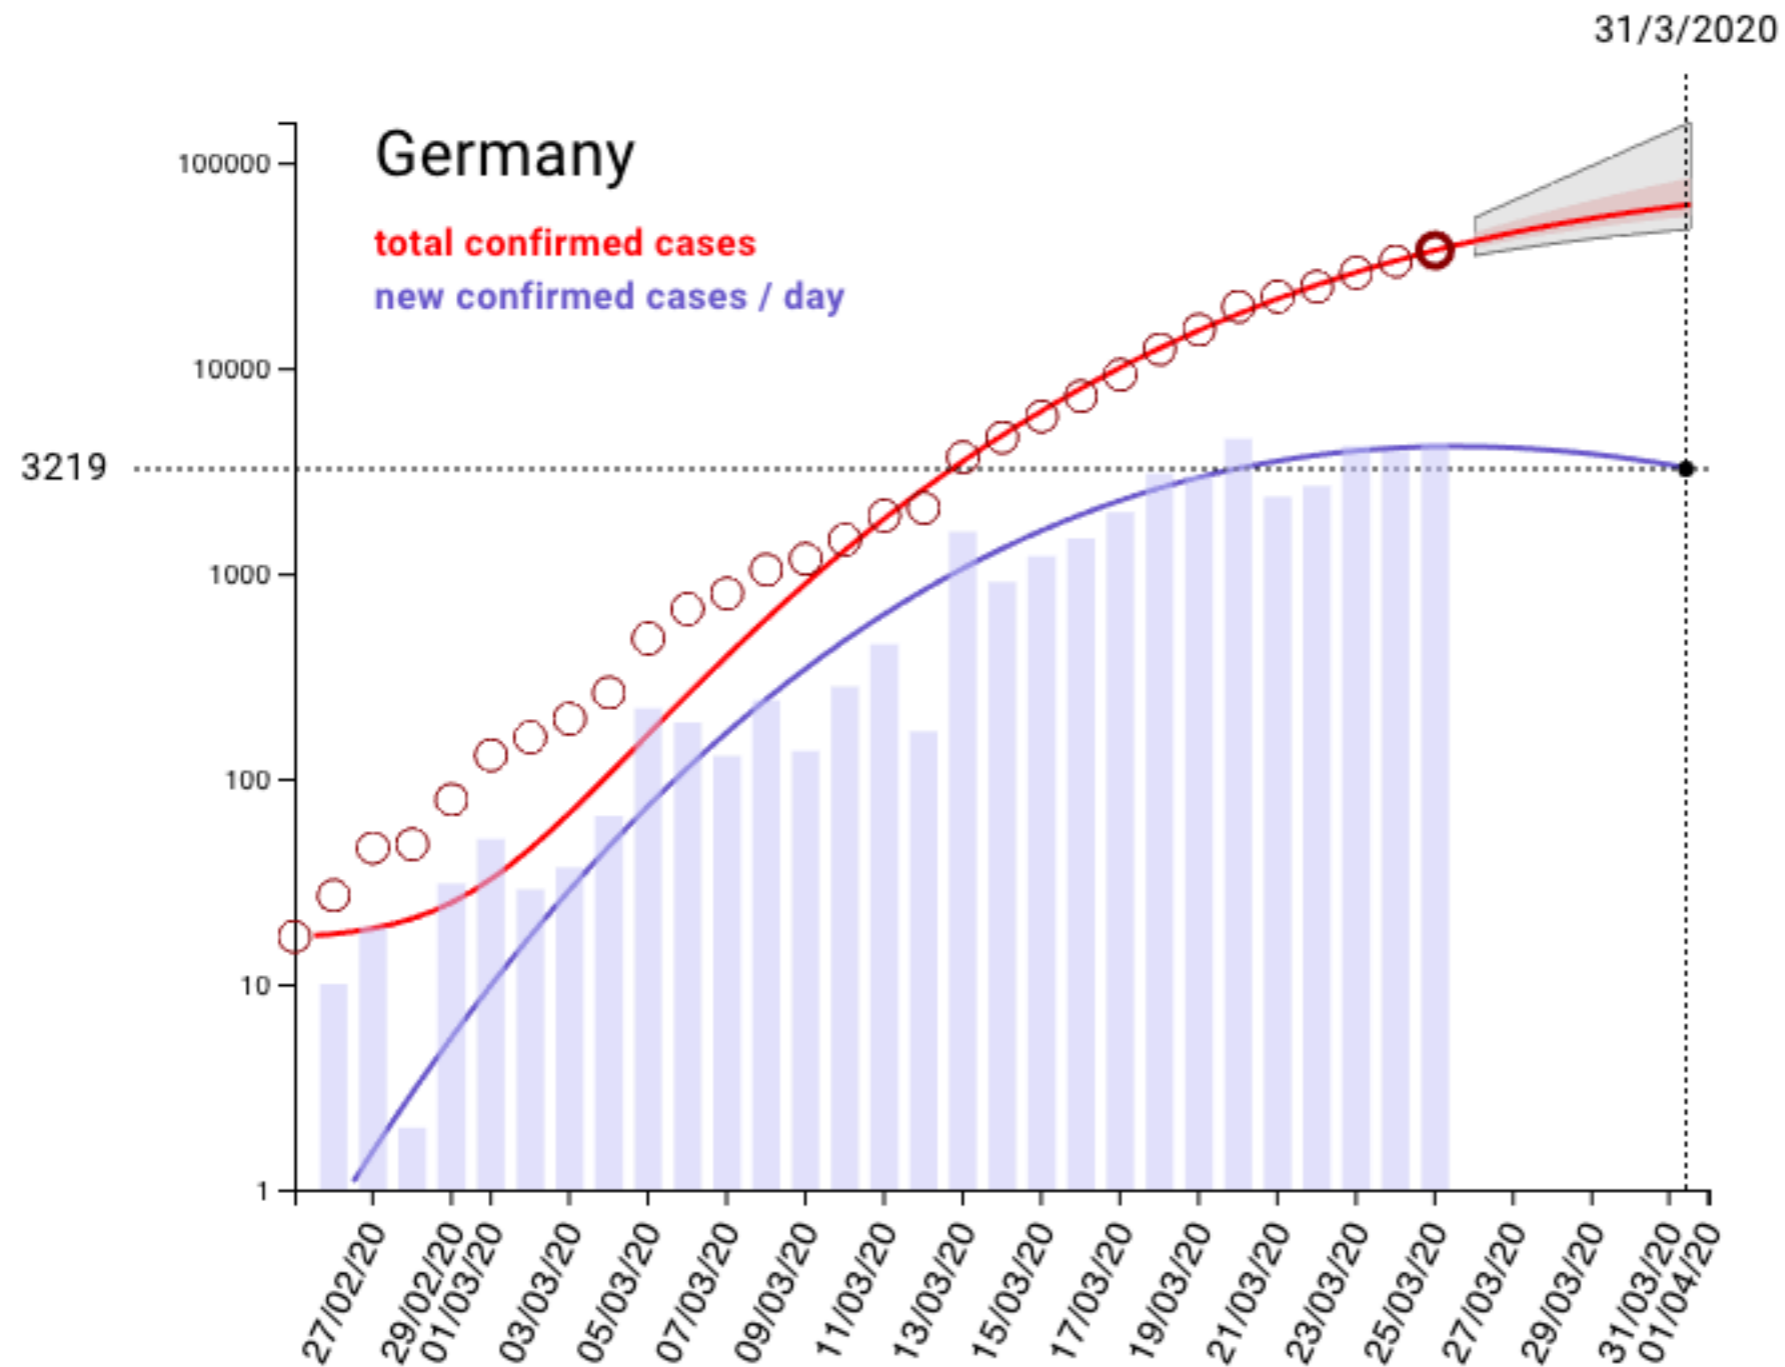

**the following 3 slides compile basic information
obtained by our computational model.**

**Further information can be obtained at the link
below**

http://rocs.hu-berlin.de/corona/docs/forecast/results_by_country/

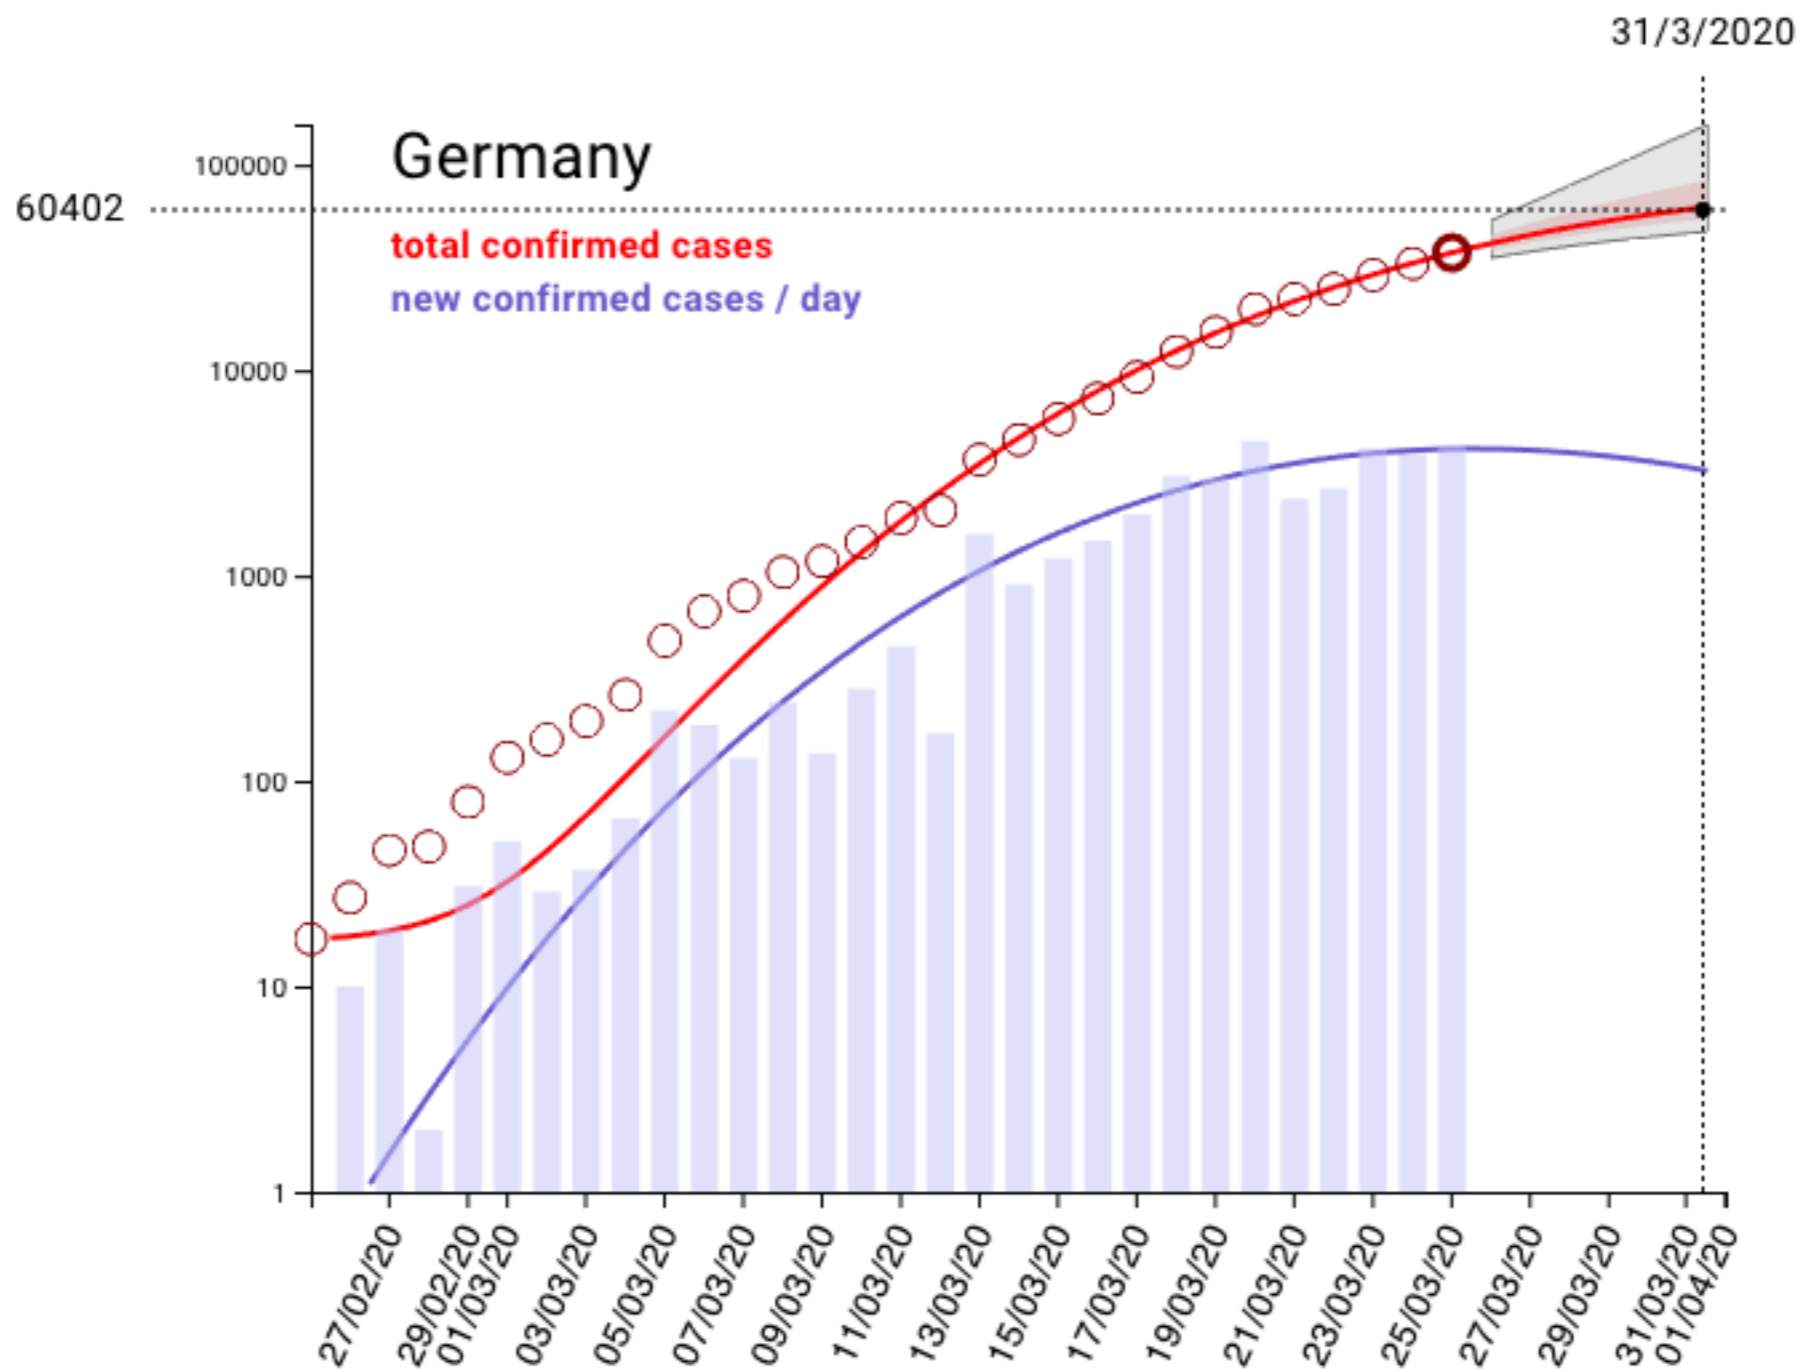

new cases in Germany exhibit a maximum around 25-26/3/20

**new cases will decrease until the end of the forecast window (31/3/20)
the maximum is "broad"**

We expect new cases > 3000 still by the end of the month

by the end of the month we expect around 60000 cases cumulatively
