

### DRAFT

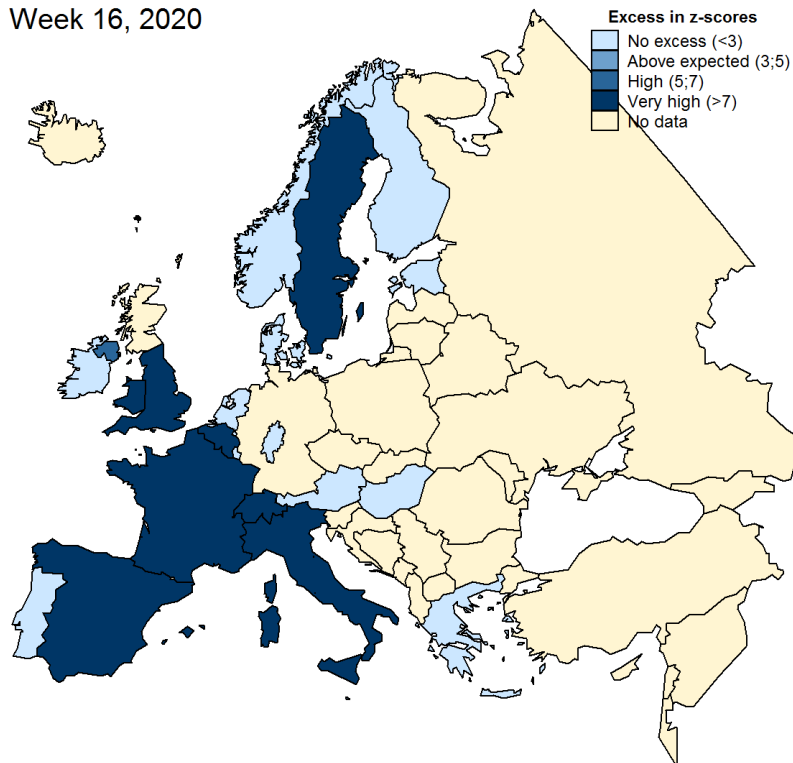

#### European Mortality Bulletin, week 17, 2020:

Pooled mortality estimates from the EuroMOMO network continue to show a marked increase in excess all-cause mortality overall for the participating countries, coinciding with the current COVID-19 global pandemic. This overall excess mortality is, however, driven by a very substantial excess mortality in some countries, primarily seen in the age group of 65 years and above, but also in the age group of 15-64 years.

Data from 23 participating European countries or regions were included in this week's pooled analysis of all-cause mortality.

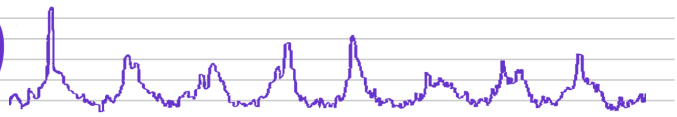

The number of deaths in the recent weeks should be interpreted with caution as adjustments for delayed registrations may be imprecise. Furthermore, results of pooled analyses may vary depending on countries included in the weekly analyses. Pooled analyses are adjusted for variation between the included countries and for differences in the local delay in reporting. Further details are available on <http://www.euromomo.eu>.

Week 16, 2020

EuroMOMO. Week of study: 17, 2020

Must be interpreted with caution as adjustments for delayed registrations may be imprecise

### Pooled number of deaths

EuroMOMO: week 17, 2020

— Stratified baseline      — Delay-adjusted number of deaths  
- - - Normal range ( $\pm 2$  z-scores)      — Substantial increase ( $4$  z-scores)

#### Participating countries:

Austria, Belgium, Denmark, Estonia, Finland, France, Germany (Berlin), Germany (Hesse), Greece, Hungary, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, UK (England), UK (Northern Ireland), UK (Wales)
