

INITIATIVE IMMUNITY DONOR

Our mission is bringing antibody therapy treatment to as many patients as possible, while passively immunizing all those at risk.

THOMAS MOSBACH, 1st chairman

ANTIBODIES WORK

As of yet, the therapy using antibodies derived from the plasma of recovered Covid-19 patients is the only comprehensive treatment that has achieved international success.

HOW DOES THIS WORK?

We have developed a digital platform, where all those who have recovered from Covid-19 can register as voluntary immunity donors. Based on their location and that of donor centers, we can then carry out a automatic matching. So that all capacities of the existing blood donation system will be used to produce the highest available amount of treatments.

WHY ARE WE ABLE DO THIS?

All acting members provide their professional know-how for every relevant issue regarding digitalization and marketing. Medical aspects are covered by the scientific/medical advisory board and our network partners.

INITIATIVE IMMUNITY DONOR

HOW DO WE REACH DONORS?

We have created a comprehensive, nation-wide campaign using numerous digital and conventional channels. We additionally ensure a high degree of visibility both in the press and social media.

COMPETITION TO CLINICS?

Absolutely not. On the contrary, our work helps to relieve clinics in that it sends matching pre-qualified donors in the required amount. We are also currently engaged in cooperation talks with various university hospitals.

IT ONLY WORKS IF WE JOIN FORCES

In Germany, up to 45 million people could be infected with Covid-19, including 5 million severe cases. No institution can successfully handle things on their own, such as logistical coordination or the extraction of the required amount of plasma.

Right now, many of the current university hospital programs do not provide a way for donors to make an immediate plasma donation. The unfortunate result is that they are often lost to the system. We make sure that donors stay highly motivated until they are needed. We do our job so that doctors and healthcare providers can do theirs.

DR. SVEN H. BECKER, 2nd chairman

NETWORK

Discussions are currently underway with various institutions,

including:

- The Federal Ministry of Health
- Robert Koch Institute
- University Clinic of Cologne
- The German Red Cross
- BKK Dachverband

Thank you for your initiative, which is very important and the right way to go.

PROF. LOTHAR WIELER, President Robert Koch Institute

ABOUT THE INITIATIVE

We are a voluntary, non-profit registered association, founded by seven people dedicated to helping make antibody-based therapy available to all those who can benefit from it.

The plasma from recovered Covid-19 patients will soon be in great demand with patients and doctors, as well as plasma- and pharmaceutical companies. There is enough for everyone. That's why we strive to cooperate with all institutions dedicated to the health of all those affected.

THE FOUNDERS

Thomas Mosbach
CEO greenants.

Dr. Sven H. Becker
CEO justfrank

Andreas Schneider
Management consultant

Sascha Mosbach
CFO greenants.

Claudia Dalchow
Actress, speaker, coach

Dr. Joachim Wüst
Attorney at PNHR

Ilisabé von Dallwitz
German Studies

THE ADVISORY BOARD

Prof. Dr. Oliver Cornely
University Hospital Of Cologne

Dr. med. Tim Kümmerle
Praxis am Ebertplatz

Erik Tenberken
Birkenapotheke, fliegende-pillen.de

Dr. rer. nat. Rolf Kaiser
Institute of Virology, University
Hospital Of Cologne

OUR DOOR IS ALWAYS OPEN

We are looking forward to every new, additional partner. After all, helping as many people as possible is best done together.
